Mainstreaming Disaster Risk Management in Government Institutions

Session 5.3 Mainstreaming DRM and climate change issues from national strategies, programmes, and plans to action at the local level

Disaster – Development Nexus: A Review

Disasters have a close connection with development. This nexus has three separate but interrelated dimensions:

- Disasters erode gains of development;
- Deficits in development create risks of disasters; and
- Development creates new risks of disasters that compound the existing layers of risk

Mainstream?

Side stream?

To mainstream (v):

To bring something into the ideas, attitudes, or activities that are shared by most people and regarded as normal or conventional; to bring the dominant trend in opinion

What do we mean by 'Mainstreaming'?

- Mainstreaming is a 'process'... to make it a **'normal process'**
- Not an one-off exercise... but rather **continuous** from short to long term
- It is not an end in itself... rather a **strategic approach**

Mainstreaming DRM into development is: a dynamic process with the purpose of....

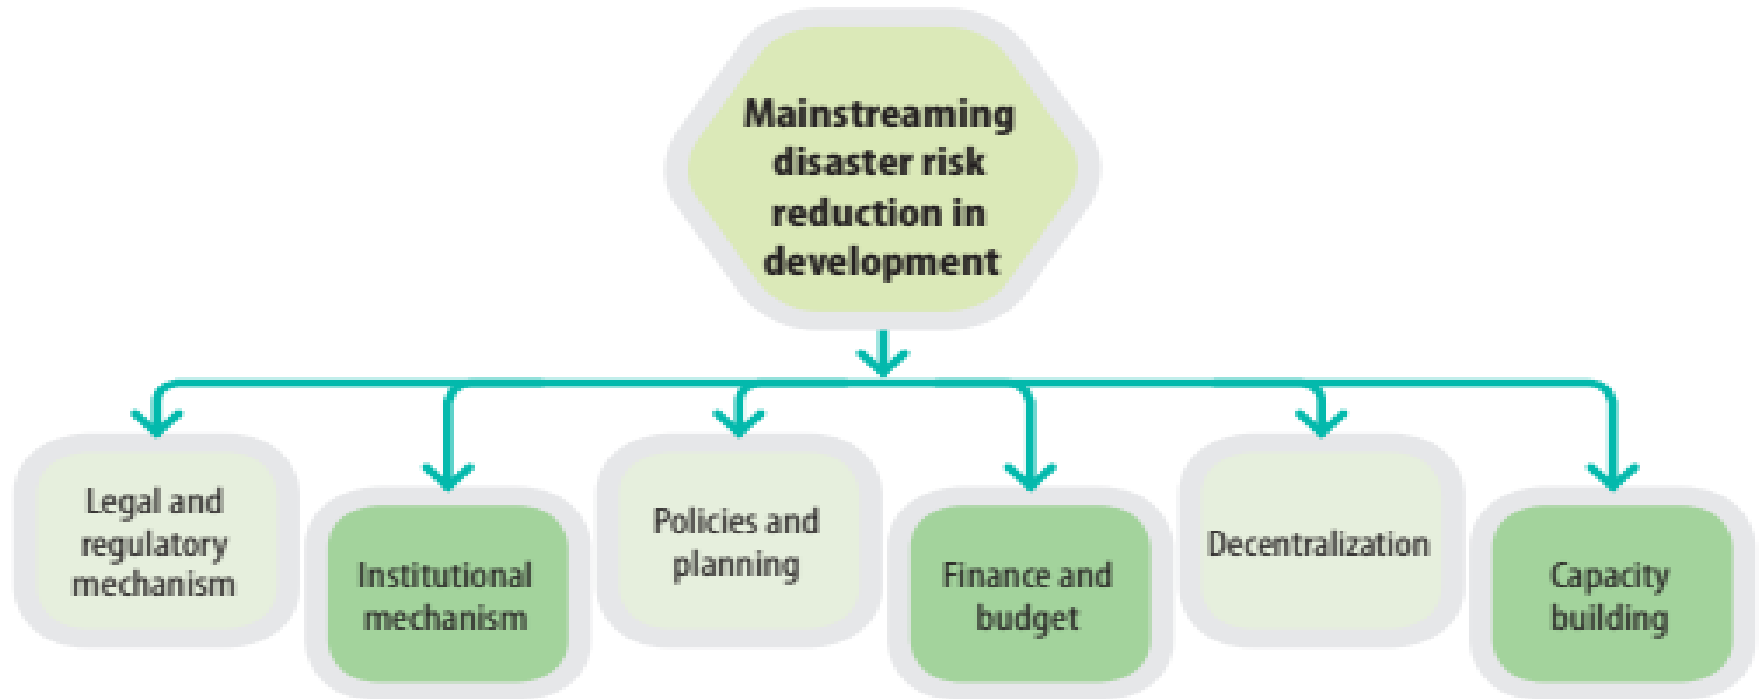

“Ensuring that current and future development does not increase people's vulnerability to disasters”

But are there critical areas or scope for mainstreaming DRM into development?...

Mainstreaming DRM and CC

Six (6) important principles of “mainstreaming”:

National DRR Strategy of the Republic of Tajikistan for 2019-2030

1. Mainstream DRM in development planning
1. High-level National DRR platform headed by the deputy prime minister with representation of all sector ministries involved in pre- and post disaster management.
1. Hold regular consultations on mainstreaming DRM into strategies, plans and development programs

National DRR Strategy of the Republic of Tajikistan for 2019-2030

1. Mainstream DRM in development planning

1. High-level National DRR platform headed by the deputy prime minister with representation of all sector ministries involved in pre- and post disaster management.

1. Hold regular consultations on mainstreaming DRM into strategies, plans and development programs

Reflection and Discussion:

- ✓ How are we doing in these three areas?
- ✓ What are the challenges faced as far as these areas are concerned?
- ✓ What do you think are the things we need to do differently?

Mainstreaming in the Local Planning District Development Planning (DDP)

Aim to reduce the vulnerability and create resilience at the local / community level.

1. Engagement of local communities to influence decision-making
1. Development of DRR in District Development plans including:
 - Situation analysis
 - Sectoral goals and development strategy
 - Development program and DRM priorities

Mainstreaming in the Local Planning District Development Planning (DDP)
